

# Case study

Carle Health, an organization with 1,437 licensed beds across 8 hospitals and more than 1,500 providers in Urbana, IL, reduced MRCP studies using CareSelect® Imaging.

Goals	Solution	Results
<ul style="list-style-type: none"><li>• Reduce unnecessary imaging, helping to increase the availability of inpatient beds</li></ul>	<ul style="list-style-type: none"><li>• Used CareSelect Imaging to analyze trends in MRI volume across various departments and specialties</li><li>• Identified unnecessary orders and key areas of intervention to change order behavior including radiologist protocols and documentation education for care setting and timeframe for follow-up exams</li></ul>	<ul style="list-style-type: none"><li> <b>24% decrease</b> in inpatient MRI order volume</li><li> <b>17% increase</b> in order appropriateness for body part MRIs</li></ul>

“The CareSelect Imaging analytics helped us identify trends that improved order appropriateness and reduced MRI volume.”  
– Kelly Oppe, Director, Radiology
